Continuation of 5. does NOT place the application in condition for allowance because: The applicant argues that Horstmann does not teach inserting at least one advertisement into at least a portion of a software program contained in a software product, by support from a advertising sponsor during the making of the software product. However, Horstmann does meet the claim limitation since, regardless of the source, advertisement(s) are inserted into at least a portion of the software program. The ad module is used to display an advertisement (which can also be downloaded and cached for repeated display) which is inserted during the execution of the program. Further, the claim language "by support from an advertising sponsor during the making of the software product" is not given patentable weight since it does not serve to further limit the advertising method steps. Inserting the advertisment into a portion of the software program can be performed by any method including that of Hortsmann given the broadest reasonable interpretation. The remaining limitations are addressed in the final office action..
